ENVIRONMENTAL POLICY

The administration of the Company showing the respect for the protection of environment developed an Environmental Management System (EMS), which is applied as described in the Environmental Management System Manual. The scope of the EMS is the “printing procedures including prepress and finishing activities”

EMS is developed in a way that covers all company’s activities, in all phases and all operational conditions (eg maintenance of equipment) and complies with EMAS III Regulation.

The Company has as one of the fundamental objectives, the respect of the environment, as well as the effort of minimizing all environmental aspects. The present Environmental Management System includes corrective and preventive actions in a way to provide a mechanism for identifying each possible improvement in the concern for the environment.

The EMS application ensures the discipline in the laws that concern the environment which constitutes essential concern of company.

The EMS application is assigned in the Environmental Manager as well as in the General Manager of the Company who are competent for the decision-making, the operation, the improvement and the determination of company’s objectives and guidelines. The environmental objectives and targets are reviewed and revised at least once a year and they are determined with measurable indicators which are also controlled. Company’s environmental goals to achieve are:

- Reduction of waste
- Good waste management practices: promotion of recycling and re-use
- Energy saving and energy exploitation
- Water saving
- Briefing and sensitization of personnel of company on issues environment
- Choosing suppliers and collaborators with base environmental criteria.

The company’s environmental performance is communicated to all company’s employees as well as to the local society, to state representatives and any other interested part, in order to prove that the EMS is live and active, seeking at the same time the attendance of all to the aim of protection of environment.
